MID-ATLANTIC DIGITAL RADIO NETWORK

Wide Area Digital Communications System Adds Coverage

New Holland, PA, March 21, 2017— Mid-Atlantic Digital Radio Network partners add additional tower sites to increase the coverage of their Digital Radio Network. (see attached coverage map)

We saw a real need for this type of service in the Eastern Shore region of Maryland, Southern New Jersey, and Delaware...said Roy Smoker President and Owner of Triangle Communications, Inc. and partner of the network.

By adding these towers to the already huge Digital Radio Network foot print, it will provide seamless communications from Pittsburgh, PA to Atlantic City, NJ and from the Pocono Mountains of Pennsylvania to beaches in Ocean City, New Jersey and Ocean City Maryland. Anywhere companies travel in the region their dispatchers will be able to communicate with their employees, and track their movement via a GPS application.

We negotiated agreements with other long time Communication providers in the region to make this possible. Redi-Call in Georgetown, DE, Magnum Electronics, Inc. in Dover, DE and Delmarva 2-way Radio in Ocean City, MD. These companies own or manage towers in the areas that are strategic to expanding our large coverage footprint. These are an addition to our existing Pennsylvania partners Center Communications located in Bellefonte, PA, and Triangle Communications, Inc. located in New Holland, PA, said Smoker.

We believe personal, timely, and reliable customer service is not old-fashioned—it is our proven key to success. It is the reason thousands of businesses in the region have chosen the Mid-Atlantic Digital Radio Network to solve their communication needs.
